

1. K-Love benefits me for a number of reasons. It provides me with family oriented, commercial-free listening. It decreases the potential for anger and aggressive driving too. It is positive and many songs have touched me heart when I have been in deep need. For example, when my wife's father died.

2. K-Love needs to remain available for Christians and non-Christians alike who enjoy a soothing and uplifting music radio station in San Diego county. It has been so important to me that I am financially supporting them. If it were not accessible I would not have anything that I felt was suitable to listen to on the radio and I would discontinue listening.

3. It is in the public interest to have a spiritually-based, positive, and uplifting radio station available for listeners. It decreases the stressors of the day while on the road, provides an alternative from talk radio or secular stations, or even stations with commercials. It is calming. The principles which it bases the songs are healthy ones for society at large. These principles seep into the consciousness and are an excellent way for people to remember to care for one another. Anyone could benefit from listening in the community at large.
